Glam's Hipster Selection

A Featured selection of Biodynamic and low sulphur wines verging on the "Natural"

The natural wine movement involves minimal interventions in winemaking. It is "controversial" as there are no really strict definitions as to what defines a "natural wine".

Generally old or no- new oak, but perhaps most importantly an aversion to the use of sulphur in winemaking.

Biodynamic on the other hand is a well established agricultural movement embracing the cycles of the moon and some wonderfully eccentric rules and regulations.

Essentially biodynamic practices are based on creating sustainable microclimates that require the minimum of intervention as they focus on the flora and fauna of the vineyard to maintain balance.
